DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I (claims 15-21 and 45-55) in the reply filed on 07/25/2006 is acknowledged. The traversal is on the ground(s) that the subject matter of all of claims 15-21 and 45-57 is sufficiently related that a thorough and complete search for the subject matter of the elected claims would necessarily encompass a thorough and complete search for the subject matter of the non-elected claims. This is not found persuasive because the system of Group I does not require to use the method of Group II. The system of Group I could use different method for measuring a surface or a location of an object. Further, the method of Group II does not require to use the system of Group I for measuring a position of a location. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

Claims 15-21, 45-55 are allowed.

Claims 15-21, 45-55 are allowed for reasons of arguments presented by the applicant in the letter received on 04/11/2006.
